

Distinctive. Choice.

Energy

In Asia since 1836.

Leadership

In 2009 and 2010, JLT generated more Energy premium into the Lloyd's Insurance Market than any other broker.

Global Solutions,
Local Knowledge

Risk and Insurance Services

Overview

JLT Asia's Energy Division has a well-earned reputation for finding creative, customised solutions for its clients, whether it be for oil and gas based operations or for the development of alternative energy sources. JLT has the knowledge, experience, and flexibility to tailor coverage to need and cost, always to our clients' satisfaction.

In 2009 and 2010, JLT generated more energy premium into the Lloyd's insurance market than any other broker (see figure 1), which is reflective of JLT's position in this sector. Our portfolio of energy clients includes many of the major, independent, junior oil, gas & petrochemical companies, as well as many principal players in the power and renewable energy sectors.

JLT has the largest energy broking team in Asia. We pride ourselves on our ability to assess the impact of industry changes and create or adapt insurance and risk solutions to ensure that the extent of protection addresses the specific requirements of our clients' businesses.

Our strength is in our global specialist teams combined with local service teams of reinsurance and retail resources.

Our clients, who are involved in very large value investments in Asia, protect them through our comprehensive range of services.

Energy Division Expertise

Our team conceives, designs, places and services tailor-made insurance and risk management solutions for the diverse exposures of a wide range of onshore and offshore energy clients in Asia. Our clients' operations cover all aspects of the energy industry including:

- Offshore and Onshore Operations
- Construction and Decommissioning
- Drilling, Well Servicing and Support Services
- Refining and Petrochemicals
- Oil Terminals, LNG Plants, Gas Processing Plants
- Oil Sands Operations
- Power Generation & Utilities
- Renewable Energy

JLT's Specialist Lines

Our specialisations include:

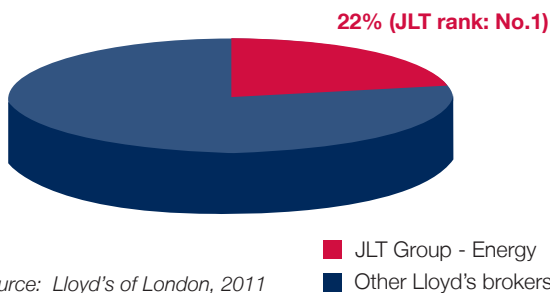

- Property Damage/Machinery Breakdown
- Business Interruption/Delay of Startups
- Construction All Risks
- Third Party Liability
- Control of Well
- Alternative/Structured Risk Solutions

JLT has one of the largest energy broking teams in the London market. JLT Asia works very closely with our London counterparts. Where necessary we will draw upon their skills and expertise to jointly deliver holistic, customised solutions to our clients.

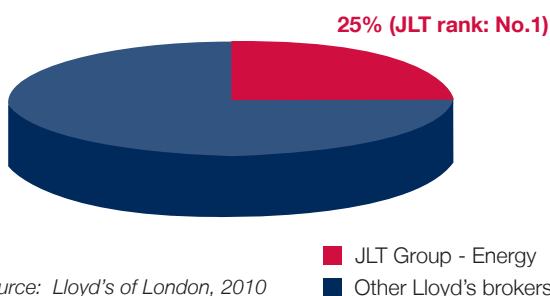

We have a wealth of experience in handling major energy accounts in Asia, and over the years have acquired expertise in the Construction All Risks and Third Party Liability sectors.

Lloyd's Energy Income (2009) – GBP1.7 billion

Our Capabilities

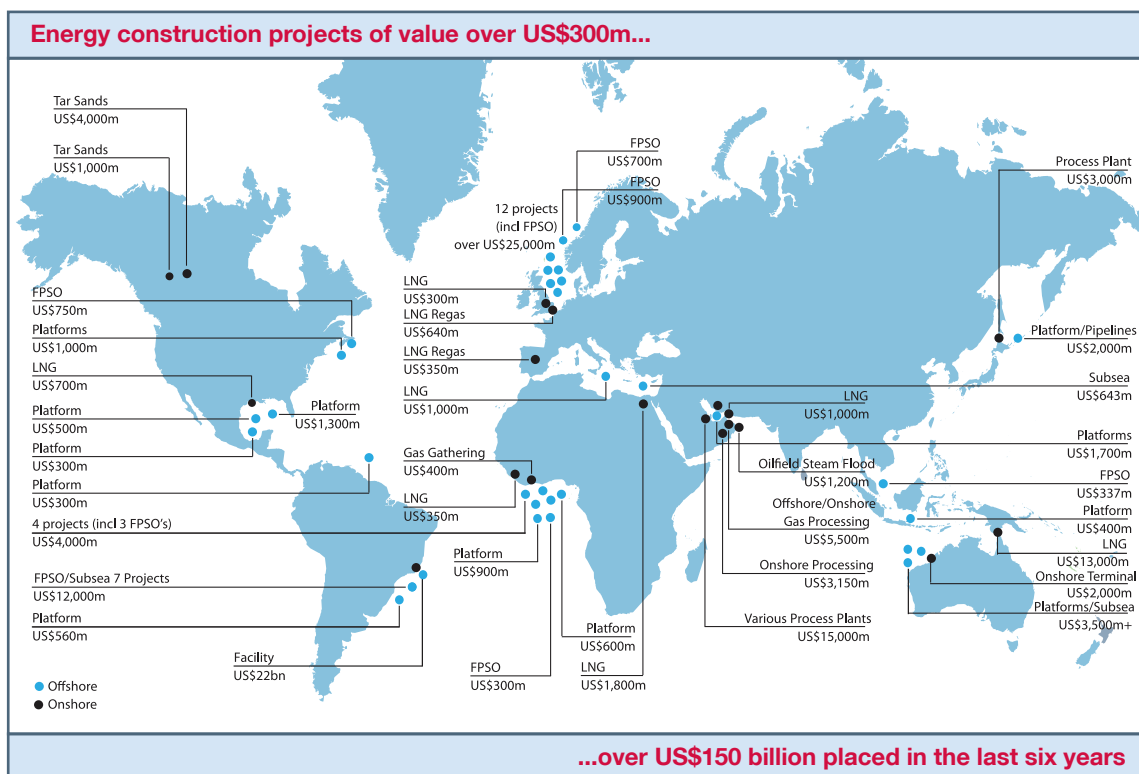

FIGURE 2

Oil and Gas

JLT is at the forefront of developing risk solutions for emerging trends in the energy sector. Leveraging our understanding of the industry, presence in the energy market and innovative ability, we design and deliver creative and cost-effective solutions to our clients.

We provide a range of insurance and risk management services to clients involved in the exploration and production of oil and gas, whether onshore or offshore. In addition to upstream drilling and production risks, we place coverage for midstream operations, pipelines and downstream operations.

Our clients include some of the largest petrochemical and refining facilities in the world. We are recognised as one of the foremost providers of insurance and risk management solutions to the downstream energy sector. Our expertise also includes all aspects of the LNG industry.

Power and Utilities

The comprehensive knowledge of our specialist staff, our extensive client base and many years of servicing experience have given us a thorough understanding of the often complex issues that affect the insurance of risks in this sector. These include developments in technology and regulation, environ-

mental legislation, financiers' requirements, and key business interruption covers.

Our service offering to the power sector extends beyond transactional risk transfer into risk consulting, auditing, due diligence and benchmarking. Our power and utilities team therefore combines the advantage of leverage which comes from the volume of business we handle with the level of technical expertise that clients need.

Key Facts

- JLT has the largest energy broking team in Asia.
- Globally, JLT has placed insurance for energy construction projects with a total value in excess of US\$150 billion in the last six years.
- JLT's global network of offices in 135 countries is one of the largest in the world.
- We are brokers for some of the largest oil and gas producers in the world.
- JLT have collected on behalf of clients approximately US\$2 billion as a consequence of Hurricanes Ivan, Katrina, Rita and Ike alone, several of the claims being worth in excess of US\$100 million individually.

Renewable Energy

We offer our clients a wealth of expertise and a proven track record in dealing with complex power and energy related projects, both onshore and offshore, and including the use of prototypical technology or project finance.

Whatever the size of the project, wherever it is in the world and across all key renewable energy sectors (onshore and offshore wind, solar, bioenergy, geothermal, hydro, wave & tidal) our clients enjoy total clarity and transparency at each stage of our seamless service offering. This covers advice and negotiation through to risk engineering and placement.

Our experience, combined with our technical strength, under-

standing of project finance obligations and influence in the insurance marketplace provide the building blocks for creating and delivering comprehensive and cost-effective insurance packages for the renewable energy industry.

Our specialists are renowned for their innovative approach to developing integrated insurance, reinsurance and alternative risk transfer solutions.
